

Driveefy

1. Add a sitemap

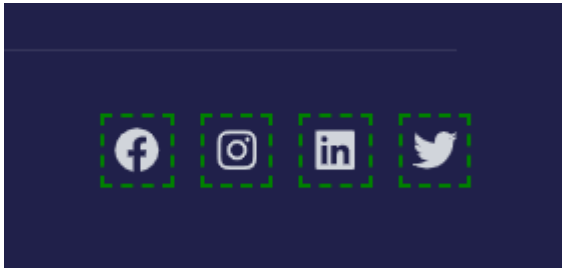

2. Add a Canonical tag (canonical tag and URL should be the same) ,
{<https://driveefy.com/>}

Your page is not using the Canonical Tag.

The Canonical Tag tells Search Engines the primary URL of a page. Google recommends all pages specify a Canonical.

3. ADD Fix Missing and Meta Titles and Descriptions.

4.

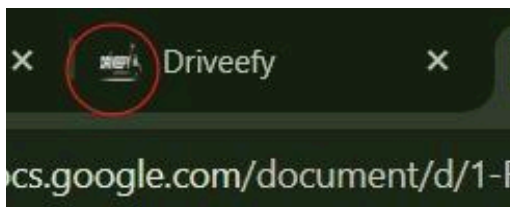

This should be a no-follow social media button.

5. do everything possible to get the error solution given tools page speed

https://pagespeed.web.dev/analysis/https-driveefy-com/latw8be6wa?form_factor=desktop

6. Site icon set a properly

7. Create a robots.txt File

8. Resize Large Images at Upload

9. Add a Schema Markup

10. Add a google analytics and search console

11. The website has two H1s, instead of one H1, there should be only one.

Your page has more than one H1 Tag. It is generally recommended to only use one H1 Tag on a page.

The H1 Header Tag is an important way of signaling to search engines what your content is about, and subsequently the keywords it should rank for.

Header Tag	Frequency
H2	1
H3	4
H4	0
H5	0
H6	0

12. You have images on your page that are missing Alt attributes.

We found 12 images on your page and 3 of them are missing the attribute.

Alt attributes are an often overlooked and simple way to signal to Search Engines what an image is about, and help it rank in image search results.

13. Two links have been added to the logo.

14. The About Us page has 7 H1s.

H1	H2	H3	H4	H5	H6
7	2	2	0	0	0

15. The services page has 18 H1s.

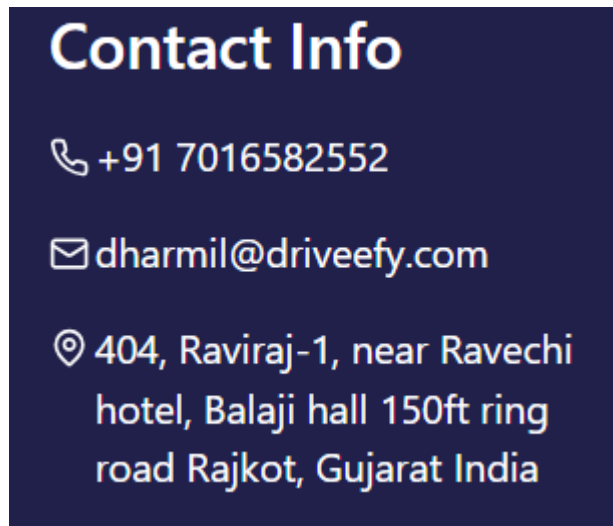

H1	H2	H3	H4	H5	H6
18	0	2	0	0	0

The website has two H1s, instead of one H1, there should be only one.

Your page has more than one H1 Tag. It is generally recommended to only use one H1 Tag on a page.

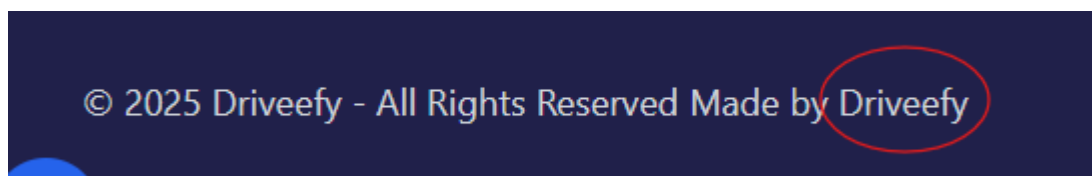

The H1 Header Tag is an important way of signaling to search engines what your content is about, and subsequently the keywords it should rank for.

16.

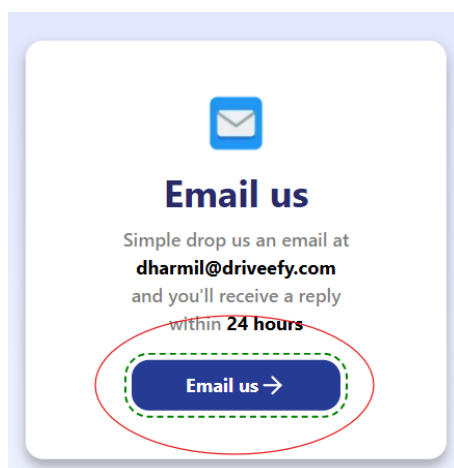

Put a space between icons.

17.

Put the link of driveefy.

18.

Put the link to the email. There is a link to the service page there.
